DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to the compounds of formula depicted in claim 1 wherein A is cycloalkyl, R1 and R2 are heteroaryl or heteroarylalkyl, classified in classes and subclasses depending on the definitions of R1 and R2.
 - II. Claims 1-13, drawn to the compounds not included in Group I, classified in classes and subclasses depending on the nature of the substituents.
 - III. Claims 13-23, drawn to the compounds of formula depicted in claim 1 wherein A is cycloalkyl, R1 and R2 are heteroaryl or heteroarylalkyl, classified in classes and subclasses depending on the definitions of R1 and R2.
 - IV. Claims 13-23, drawn to the compounds not included in Group III, classified in classes and subclasses depending on the nature of the substituents.
 - V. Claims 24-27, drawn to a method for the treatment of LXR-responsive diseases.

The inventions are distinct, each from the other because of the following reasons:

Groups I-IV are directed to structurally dissimilar compounds such that the variable core created by varying the definitions of the formula do not belong to a recognized class of chemical compounds in the art, and references anticipating one invention would not render obvious the others. In addition, the compounds in Group I and Group III are in difference scope. Thus, separate searches in the literature as well as in the U.S. Patent Clarification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled

in the art would not consider such diverse structures as functional equivalents of each other. The mere fact that there is a single similarity is not in itself a significant reason to render the whole embodiment obvious.

Inventions I-IV and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case more than one use exists for compounds of Group I as evidenced by claims 25-27 drawn to a variety of diverse uses. Additionally, the various uses would raise issues of enablement separate from that of the compound claims and would require art-recognized evidence that activity relied on its reasonably correlated to in vivo efficacy for the uses claimed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Tentative election of a single species with the elected group is further required.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
